

The **"e-Infrastructures for Research and Education to promote development"** Conference from 7th to 12th June, Amman.

Amman hosted a whole week dedicated aiming at discussing the role of eInfrastructures for research and education to promote development and fight the digital divide and brain drain in developing countries.

The information week was organized by the Jordanian Universities Network (JUNet), the Jordanian National Research and Education Network (NREN) in the framework of the EUMEDGRID, an international project funded by the European Commission.
