

Welcome to EGEE

The Enabling Grids for E-science (EGEE) project is funded by the European Commission and aims to build on recent advances in grid technology and develop a service grid infrastructure which is available to scientists 24 hours-a-day

2006 International Summer School in Grid Computing

Posted on February 6, 2006 - 15:03

The next International Summer School in Grid Computing will take place from the 9 - 21 July 2006. The school will be held once again in Italy, this year in the Jolly Hotel Delle Terme, on the beautiful Island of Ischia in the Bay of Naples. Students from all over the world are invited to apply for the well established school, now in its fourth year.

Official Kick-off Meeting of the EUMEDGrid Project

Posted on February 6, 2006 - 14:30

Today the EU EUMEDGrid Project (empowering eScience across the Mediterranean) officially started with a kick-off meeting held in Malta. The main objective of the project, funded by the European Commission in the framework of the 6th Framework Programme for research and technological development, is to support implementation and use of a Grid infrastructure across the Mediterranean Area, thus fostering the development of e-Science applications (such as hydrogeological and medical applications) connected with already existing activities in Europe, in line with the support to the intercontinental extension of the European Research Area (ERA).

EELA Takes Off!

Posted on January 30, 2006 - 11:10

EELA, the E-Infrastructure between Europe and Latin America, will be officially launched this week. The project will create a human network dedicated to work on Grids, e-Infrastructures, and e-Science.

Funded by the European Commission with 1.7 million Euro, the project aims to build a digital bridge between the existing e-Infrastructure initiatives that are in process of consolidation in Europe (in the framework of the European EGEE Project), and those that are emerging in Latin America, throughout the creation of a collaborative network that will share an interoperable Grid infrastructure to support the development and test of advanced applications.

The EUChinaGRID Project Kicks-off

Posted on January 24, 2006 - 08:00

Today, the EUChinaGRID (Interconnection & Interoperability of Grids between Europe & China) Project officially kicks-off in Athens. The main goal of this European Commission funded project is to support the integration and interoperability of the Grid infrastructures in Europe and China for the benefit of eScience applications and worldwide Grid initiatives, in line with the support of the intercontinental extension of the European Research Area (ERA).
